BOTH PHONES

Mr. C. S. Belden.

#287 West College.

Oberlin, O.

Dear Sir:-

After you left our store today, I spoke to my brother regarding the extension on your camera. He informed me that we had an old extension here, from an 8 x 10 camera. This will be too large for your camera, but you could easily cut it down. It has the same tracks as your camera.

I will lay it aside here for you, and will send it to you with any orders you may send us.

Yours respectfully,

The Weidenthal Photo Supply Co.

## MERCURIFORM.

Mercuriform is a definite chemical compound of a mercuric salt with hexamethylenamine. In germicidal action it resembles corrosive sublimate, but its sparing solubility in water makes it a safer agent to use than that salt. A saturated solution in water contains only one part in 1000 of the compound. The salt has been used with very good results in ophthalmic practice, in the form of an ointment, 1:3000, and it is in that form alone that it is at present supplied by the manufacturers.

The following experiments show the efficiency of Mercuriform as a germicide.

Exp. I. A broth suspension of *Bacillus pyocyaneus* was treated with a solution of Mercuriform 1:50000 for periods of 15 minutes. It was found that the life
