

Dear Mamma=:

This is the new tyewriter that I have got on approval and of course I don't know how to run it very well. I think I am going to keep it. If I do, I shall have four different types. There a score or more that one can have if he wants to pay the cost of the different shuttles. I seem to skip letterd on this machine: you have to press a little harder than on the machine I have been accustomed to. This is a Hammond, the kind I was talking about when I was at home.

I have a new idea now about how to get some money-making work on the side - teachers' institutes. They last only a week or so and I think are during vacation time. Also, I have heard they pay well. Don't you think that would be a good venture? I have wrotten a letter to those two sisters in Painesville who teach in the grades there and were in a class of mine at Lake Erie to ask them for information on the subject.

Miss Brown is making herself a dress that she will wear to the reception that we all are invited to this coming Friday. I take a great deal of credit to myself for her getting that done!

Well, it is about time for me to go down to my evening class. We have got to get out and scurry around for students for those classes for next semester if we don't want the school to fall to pieces

If you have a whole goss-gettle sleeve,
you'd have to have the goss-gettle set in rather high
on shoulder.

I am afraid that will not look nice over heavy silk. I saw some georgette at a bargain today and if it isn't gone too soon, I will try to get some for this purpose. If I don't, Miss Hard can get a little in Oberlin. There is a second piece in the card of the beaded material and I am not sure you will want that for this dress, but it will do to put away. I hope you like the stuff. I will make a diagram.

I am crazy for a letter from you, Lady. It seems years since I was at home.

With love,
Polly

Cut across the material, use lengthwise, I think

See over for diagram

~~next~~ One of my four students has got married and two of Dr. Gregg's ! I think we are to make some speeches this week.

Good bye for now, Lady sweet.

Polly

Thursday. I was down street this afternoon and I picked up a piece of beautiful bead trimming on a bargain table that I think would help solve the problem of how to make the sleeves for your beaded dress, which I hope Miss Hard is soon going to make for you. The clerk said this stuff sells for about \$9 a yard. This is a drummer's sample. I paid only 50¢ for it. I would cut the wide piece in two halves and insert a piece in each sleeve lengthwise. It will not be as long as the sleeve and I believe I would put it at the lower part so that the flower comes just above the hem. I remember you said you would rather have the sleeves of the heavy silk, but I believe it really would look quite a little better to have them of georgette. However, if you want them heavy si as not to show underwear through, you might have georgette merely under the beaded stuff
