Bremen, how much richer the future was, in Bulgaria
the often speaks of them
pink as you shall do
much last summer.

I think neither of you
will forget your ~~what~~ the
you are you now do
Ellic. After this you
recovered his strength
He takes genuine but
meant very day, & d
I was very aching & pain
more spectrally than
any thing else. My
body takes it here,
I am sorry as all
I am sorry as all

You will conclude
before this time that George is
better. He has had quite a run
time but has been coming down
stairs for a couple of days - and
has a good appetite, but is still
quite weak - and very thin.

The weather is so unfavorable
that he cannot go out of doors
until it changes. For a couple
of days it was cold & bright now
it is again raining or foggy.
Chas had a pretty sick time
we felt very anxious for a couple
of days, but he seems quite
like himself today - He is quite

Since his milk had been taken
away. He would not eat the proper
food the Dr recommended. He soon
really starved. until we began
to give him rice & beef tea
which he called soup & which
he called for incessantly. I don't
know when he can resume the
milk. Joe was here just two
weeks & was really reasonable
all the time. He came with
the Grippe. we wanted to keep
him longer but for the last day
of his stay he seemed so much
better that we could not insist
upon it. & he felt that he ought
to go. I had the Dr examine his
lungs, heart &c. & he pronounced
him sound in every particular.

In many ways he reminded
us of dear father and his nose
is of the Scantler type, altogether

his eyes. I have lost any Henry
look if it was not for the blue
eyes, which seems a pity. However
it is not a serious defect.

I don't know whether I wrote
you that I expect to leave here
Feb 5. to visit Mary Cooper
in Chicago & then we will go
to Fort Worth together. I am so
glad to have her for company,
for I rather dreaded the long
journey alone. It is four hours
from here to Chicago, she
arrives there in the morning.
Does she want to see some friends?
The train from here is due there
at 4-30 & we leave 5-30.
on the C & O road. Well, I
am so anxious to hear how
you are getting on with the
whooping cough, whether the
children have it badly or poor

I suppose you have heard of
Aunt Elizabeth's death - I don't know on Sunday
Mary has been ill - I don't know how long.
I.C. Dr. nothing.

baby I feel the most sorry for
him but what a mercy - you
had ^{not} gotten away or been torn
up. Surely, you must be kept
in Bridgeton for some purpose
& I trust you will possess your
souls in patience & I hope your
last days shall be happy
& profitable to all concerned.

We must ask & expect this and
that every thing will work together
for good. It is a very happy thing
to me that we are in God's hands
& that He directs every thing for
us - Oh, be careful for nothing!

Let us remind the towns to
write & let us know how you are
all getting along. I think it was
quite a help to Carrie in baby,
