

Dear Will: -

I want a tallyman and want him badly. I wish I could offer big wages but I can't to start in with. I can pay you \$2.25 a day and you can make over a day overtime every week. The work will be very easy just a piece tally and I will be responsible for all the shipping. Board & room cost \$5 a week and the board is good. If I have here you could step into my place and it will pay \$25 a month and board to a good man and more later. The blasters started yesterday blowing up stumps for a railroad to run into the woods and with no one but myself to compete against we can run things our own way. You would have to boss the loaders and whatever might need to be done around the works. It is the best thing I ever offered and I consider it far ahead of Parker Lumber Co. If you want the job pack up and come ahead on that morning train and I will put you to work at once. Hope things are picking up a little at the Parker Lumber Co.

Hoping you may see your way clear to take the place I am

Yours  
Thomson

Your friend  
Percy D.

After.....day, return to
