

Hot Springs

Wednesday Mornng -

May 28<sup>th</sup> 1924

Caroline Rip onko Rd.

My dear George

One thing I've decided upon & that is that you all to miss no more days for letters - perfectly absent if I cannot find time to write you a bit each day -

Sat night Suedsee went two boxes from Blue Falls of outdoor clothes of Mr Wilmarth his sister Suedsee came with the most creations with squares but her brother had grown too stout to wear them - Every thing all so none but that they can be cleaned & pressed & if Sunday

cannot wear them perhaps  
he could give them to some one.  
- No - they are from Bertha  
Wilmouth's sisters - husband  
- who lives in Erie Pa. -  
The suits - are four different  
weights - all three price -  
all look like new - a  
white, a tan, a gray, a blue  
and a very good looking sports  
one coat - looks like new -  
I say where are the shoes  
socks + shirts - to go with these  
beautiful clothes -  
they fit - Siedsag is just  
handsome in the white and  
suit - in them all as far  
as that goes - What would the  
children have done without

<sup>2</sup>  
- all these friends?

Preserve me from any

"Student help - graduating  
down from Marlboro College  
girls to fifth grade over  
here - all are from - that  
is" according to Carline.

These girls are dear as can  
be, but so careless, and so  
little responsibility - so  
forgetful, you say the same  
thing over & over again, &  
I have seen the same thing  
to see again - it is all  
right for me, but how will  
Sertu ever get on? I try to  
realize that it is not my problem

except that I am true -  
indeed I really doubt from  
trouble about it meant we  
no way keeps the fact from  
being a fact.

It is still raining, cool but  
also sultry, so dark too.  
Almost ~~every~~ one is gone now.  
Very different from the school  
year. Sunday is getting a  
head of rest - that is - he  
didn't get up till eight today  
either - really lies down so  
times he hardly has known  
that he is about. I think  
part of the time hasn't.  
It is a great deal to keep  
response when my thing

3 is on the buzz —  
I think Seta is going to get  
awfully depressed if she gets  
too tired, she has not a very  
large one supply of reserve  
force at present — but she  
will not have much chance  
to overdo while I am here.  
I do feel so anxious that  
she should be spared the  
sleep that her hampers  
all my years — and she  
has a greater woman pain  
is my dis agree — this  
question might not be  
so much of it if science is  
so much further advanced  
as it would seem to be, than

It was in our greatest  
need - the extra help  
of the grand mother -

When quite a good deal to  
say about Humphrey, but,  
will not write it - too long -  
he's a frail little fellow.

I am reading quite a good  
deal to him these days - &  
joked in with off all  
yourselves - after his nap -  
& before the others wakened  
to do some errands - trying  
time we create for us all -  
He has a good little visit, &  
he was so happy - his dear  
little hand in mine all  
the way - he doesn't cough

4 Nov - but - still has some  
color - so has Caum - but, he  
too doesn't cough.

My! but it is black & rainy  
a little bit gloomy, but,  
it is perfectly beautiful here,  
as I look out from where  
I am sitting on the corner  
board<sup>7</sup> & see these beautiful  
green mountains & all  
the fresh green of spring  
- almost sleep this morning,  
I can't help myself that one  
child can be on, rather  
than under the hill to  
be. There are real mountain  
clouds hanging below the  
hill tops - I think these

Eastern mountains very  
different from the Adirondacks  
or the White Mountains,  
but these hanging clouds  
make me imagine for  
you and me in our boat  
up a Big Moose Lake.

The big children will just  
die to have us go there  
instead of coming here.  
and I'm especially very  
glad up the hope that you  
will one day be here to live.  
only justly he was  
speaking of it again -  
I'm as dull as the day, but  
there is one difference I  
am not crying, & the sky is

5 and ferocious just now.  
Inside here is growth  
Hueder, & some little  
legumes - This is sand  
the clear up storm - the  
know? it may clear up  
me brain too, and I  
be yet bright - wouldn't  
that be a joke?

I suppose quarts of fine  
straw know an wasting  
in this rain, too bad!

Heats on -  
I have written asking Ellen  
if she will take Caroline in  
Sept. to live in country  
Creek in Dulles College.  
The Caroline
