Hotel Albert

May 24, 1924

My dear Caroline ^{Sue -} ^{Hubert} your letter of Wednesday came yesterday - nothing else.

I am quite anxious to hear about Commencement - do hope that the rain held off. It is very wet here again; I got caught in a heavy down pour this afternoon, having started for a walk in Central Park, and had to change all my clothes when I came in. Now, at 8.30, rain is still coming down fast.

Caroline has surely developed most rapidly! Have you decided whether her musical instruction is to be by the Fletcher method, and can you secure a good teacher now that Miss Lord is going to leave Hot Springs? Possibly it might be well to arrange for her to attend the Conservatory at Oberlin; she could live with Ellie. #

Last evening I made a call at Tyson Street. Here is a new one from Annie. A friend of

has been ill for some time and no one seemed to understand just what was the matter till he consulted Dr. Craig who examined him with a telescope and discovered a wound on his stomach!

Have you read any accounts of the General Assembly now in session at Grand Rapids? Apparently the "Fundamentalists" are in the majority. Am sorry that Baynes has been appointed Vice-Moderator and that he seems to be very influential otherwise. I don't think he will in the long run help the conservative side very much; he is too reactionary and eccentric; also inclined to introduce old political tactics into the session.

A fire last night on University Place, almost directly opposite this hotel - just above 11th Street. I was much interested in watching the business-like way in which it was handled. After the apparatus had arrived everything was conducted in such a quiet orderly way; no shouting of orders or any confusion. The firemen carried ladders of hose up the fire-escapes to the third floor where the blaze was, with no man fussing there if they were getting ready to move a safe. The fire was confined to that floor and put out in about half an hour but of course the whole place below was water-soaked.

Much Love
Yours, Geo.
