

Hot Springs
June 4 1924

My dear Eva

Another fine, early &
shilliey letter, you will
note this -

We had breakfast - no real
dinner - supper is yet to
come - Oh my! I wish that
enough to fill one with many
a mild enthusiasm? My!

Your letters are interesting as
my - I was glad that you got
my letter before you did see
telegram saying decidedly was
probably one work - I hope
you don't see him looking or

badly as I think he looks
- and - indeed what next?

In love take out the stone
Today, I won't seem deep in
the love take others out, but,
I have such a feeling about
the re-setting, and can't
make it - this is again just
preparing to do the work.
and when will be the place.

Sister entered on her quiet
route to Dr Hook for the
so fearful that Leedsey will
very long before he should
and hopes her letter will make
him - Dr Hook - more serious
than he might otherwise be.
Sister is simply fine George in
this all, I can't wait about her

²/₋ much of age, but she is a
grand young woman - -
also - she has the office
come to her any money she
she attends to the mail, and
all the office things needed.
She will have her School Board
line (instead of at School) in
a day or two - an important
meeting - which she feels
quite free to conduct -
she's broad - and has a big
outlook - but - you know her
Why do I tell you?

Carline is perfect -
She simply sees better capital
less returns - I'm thankful
to say, we have her round at line.

Caenus lip is a right yet -
Dr Beck is coming to take out
the stitches tomorrow I guess - he
eighth day since he lost it -
he can eat pretty well still
drinks thru a tube to keep the
plastic dry - he is feeble but
brave little chap - his eyes
are now blue so beautiful as
they are lately - I do hope &
hope again that the proper
shape of his lip will return -
he has lost it a couple of times
& made it bleed, but I fancy
that it has not really injured
it - he is the best little boy -
Yesterday he wanted to know what
that brown was - I said "it's that"

3 is the old blood" —

"Well?" he said — I don't like
old blood it keeps falling
falling down my throat &
makes me feel like "spitting"
(vomiting) I don't like it —

I ask him how long that has
been — it seems from what he
says that it has been looking
most of the time since the
wound — but the man with
my 'denture' never speaks of it
for so long — he or his
doctor never — he really just
quake but he do something
deafening before his lip is well —
& his eye so near cutting it

so many times - no doubt you
mother felt that way when you
cut your mouth with your
teeth running thru your
lips -

There is a disease to seed the
lungs called - tuberculosis
any way - but - also here
you are aware of the type -
for - from this country I shall
say a mountain of love

From Caroline

~~I want to
go to
see
you
in
the
mountain
of
love~~

Mrs. W. H. Belden
287 West College Street
Oberlin
Ohio

2 1/2 cups flour (Straw's down) ^{blow}
