

Dear family, I'm so sorry Dad has to suffer so much - his so sweet, he doesn't deserve it. He ought to be up here in this perfect beautiful spring with the lake and hills and trees - he'd love it and he's so much more worthy of it than I. Feel us long as I am here I wish I had his hotcha brain & good memory.

We went to the Museum in Cambridge yesterday where I had to play Sherlock Holmes & find the required pictures.

Museums sure do get me drowsy. Ken was on the train coming home so she came on out here to dinner with us.

Will that female never change?

I'm working on two big papers now, and exams are only a month away - he's hoping for bigger and better marks.

Love Dad I love him an awful lot.

Red

of the kind of Σ services of the liver it seems to be one of these.

Dr Phillips told me that the man who was superintendent of the hospital ^{precisely the one that} now, has been that of all the witnesses that has ever been there at his time W.H. Taylor was the smartest and best.

Many when you all come here, maybe you could drive, but meeting you at Columbia spring back with you that you, there getting round trip to Columbia only. This if word goes before college closes. Then I thought maybe I'd get Elizabeth + Russ to stay nights at our

house + let Victoria give herself food (at my expense) and I'd go to Columbia (4) until school was over. I spoke to Elizabeth about it + they would be glad to do it.

Many I wonder if I better borrow a car ^{not unless you drive} when you come to town here. Of course you'll see to it in many places but we'd rather stay in the house if we can. That if suppose Jack + Cora would be here, maybe Carl and I think Leslie and Sylvia. Maybe the Taylor couple go out to my quarters but I'd have to see how they feel.

How will you send this to Renee?

please? no more now.

Lots of love and kiss both Minnie
for Mother,
Pam.
