

Thurs July 25/33

Dear Eulie -

Dad feels much better today & has taken food pretty well. The doctor gave his diagnosis this morning of cancer of the stomach & gave it as his opinion that Dad would live only a few weeks. I asked him to call in a stomach specialist for consultation & he did so. After examination the specialist gave it as his opinion also that he has cancer of the stomach - malignant - but thought he might get to feel fairly well for a while with proper diet but would last only 3 or 4 months. They can't take Dad that but the doctor will do so in a few days when he gets a little stronger. They say Dad wouldn't be able to take a long trip on the train. Probably I will arrange for Dad to stay at the hospital so his case - when he would have constant medical & dietary supervision & he could go out & be about when able - if he should get able.

I suspect they can give him digitalis today which may account for his great seeming improvement.

I might leave Thurs. night ~~but~~ if there is enough improvement but I can't say yet. Have a lot of things to attend to for him & won't say there as far as he is in the hospital.

Love to all,

Ray

Hope you are all well

After.....days, return to

3521 38th Ave So

MINNEAPOLIS, MINN.
