

is such a constant tatter that
he needs to be away from her to
teach him to assert his talking
ability. I think no better preparation
could have been for his entering
kindergarten than for with you
all. He needed to be away from us
but he needed to be loved too for
himself. I really am surprised
how he has gone right along to
kindergarten alone + to Sunday school.

Dr. Wallace thinks he should
have his tonsils out or in that is
my mind but his had a cold that
hampson. Dr. W. advised not
entering kindergarten till this was
done but I felt he needed to
start right in his own

self assertiveness + he'd hated to
have seen his best friend Jimmie
go + not go. I don't blame it all but
him to start. Thank you all
again for the summer. You not only
helped the body + Mary + us adults
but the child himself. I am a
great believer in a child's getting
away from home by himself at
frequent intervals. I wish I could
have one of yours in return.
